Flex Track is the easiest and most cost efficient method to build curved walls, ceilings or bulkheads. Flex Track bends both ways to create non load-bearing curves and openings, including wavy ceilings, barrel vaults, arches and columns. Flex Track can be used with wood or steel studs.

Material

Sizes: 2-1/2", 3-5/8" (18 mils), and 6" (33 mils), 33ksi, available in 8' lengths
Coating: G40 min
