

J Trim

Metal J Trim provides edge protection at window and door openings and where wallboard butts against concrete or other materials. J Trim is installed prior to wallboard installation and finishing compound is optional. J Trims are used with 1/2" or 5/8" wallboard and are available in 8' and 10' lengths and are packaged in 20pcs/ctn.

Standards: Manufactured in compliance with ASTM C1047 (Standard for metal trims), ASTM C754 (installation standard), ASTM A1003 (steel grade) and ASTM A653 (zinc/galvanized coatings).
